

ENGINEERING TECHNOLOGIST

ST. JOHN'S – CLOSING DATE: MARCH 22, 2019

COMPETITION NUMBER: NPJP-2019-20055

Are you ready to explore an exciting career in a fast-paced, high-performance environment?

If you are seeking a challenging and rewarding career with room for continuous advancement and a competitive compensation package, have we got an opportunity for you! We are looking for a highly motivated team player with a strong commitment to safety and customer service, an excellent work ethic, and effective interpersonal and communication skills.

As a valued member of our Engineering Team, you will be responsible for the planning, design, construction and commissioning of the power system, including equipment specification/selection, as well as protection and control schemes for generation and substation configurations. All engineering work will meet applicable industry standards for safe and reliable operation of the electrical system.

Qualifications include a diploma in Electrical Engineering Technology. Proficiency with Microsoft Office applications is required. Proficiency with Electrical Protection Relays, CYME and AutoCAD (Electrical) and communication networking are considered assets. You have strong analytical and project management skills and are able to execute technical tasks with particular attention to detail. You have a strong knowledge of industry standards and practices as they relate to the design of utility substations. You must hold and maintain a valid motor vehicle driver's license. Travel will be required.

Apply online at newfoundlandpower.com/en/About/Careers/Career-Opportunities. We thank all applicants for their interest but only those selected for an interview will be contacted.

WHENEVER. WHEREVER.
We'll be there.
